New Barrackpore, Kolkata 700131, West Bengal, India

PROFESSIONAL SUMMARY

B.Tech Computer Science & Engineering graduate (CGPA 8.09) from Calcutta Institute of Engineering & Management with strong expertise in data analysis, database management, project leadership, and process optimisation. Previously worked as a Data Entry Operator, Image Annotation Engineer, and in the Logistics Department on a contractual basis, gaining practical experience in high-volume data handling, accuracy, and operational coordination.

Led two college group projects to outstanding success and delivered a Medical Inventory Optimisation project at 360DigiTMG, focusing on data accuracy, cost control, and actionable reporting. Proficient in Power BI, Advanced Excel (Pivot Tables & Dashboards), MIS & KPI Dashboards, Python, Java, MySQL, PostgreSQL, and Generative AI.

Known for multitasking, problem-solving, and team-building skills — ready to deliver high-quality results in any technology or operations-driven role from day one.

LEADERSHIP EXPERIENCE

College Group Project Leadership Team Lead | Calcutta Institute of Engineering & Management

- Successfully led two major group projects (team size 5–7 members) from planning to delivery
- Achieved outstanding results through effective task delegation, timeline management, stakeholder coordination, and problem-solving
- Built strong team culture, resolved conflicts, and ensured timely completion with high faculty recognition

INTERNSHIP

Data Science & Data Analysis Intern 360DigiTMG, April 2024

Medical Inventory Optimisation

- Analysed and optimised inventory processes to reduce patient bounce rate and control costs
- Delivered business solutions that improved operational efficiency and revenue potential
- Created detailed reports and dashboards using data analysis tools

PROJECTS

Advanced Software Engineering Job Simulation | Walmart Global Tech, March 2026

- Designed UML class diagrams for a data processor handling multiple operating modes and database connections
- Solved complex technical challenges across different teams and systems

Power BI Data Visualisation Job Simulation | PwC, June 2024

- Built professional Power BI dashboards to visualise HR KPIs and respond to client requirements
- Demonstrated analytical problem-solving and clear data presentation skills

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering | Calcutta Institute of Engineering & Management CGPA: 8.09 | July 2024

Diploma in Computer Science & Technology | Regent Institute of Science & Technology 80% | June 2021

Higher Secondary (H.S.) in Pure Science | Kodaliya Agapur High School 59.6% | May 2018

Madhyamik | New Barrackpore Colony Boys' High School 73.8% | February 2016

SKILLS

Data Handling & Technical Skills

Project Management | Project Coordination | Calendar Management | Vendor Coordination | Multitasking | Record Keeping & Documentation | Collecting and Organizing Data | Facility & Asset Management | Travel Management | Security & Housekeeping Oversight | Administrative Operations | Problem-Solving | Strong Leadership & Team Building | Legal documentation | Time Management | Detail-Oriented

Technical Skills

Power BI | Advanced Excel (Pivot Tables & Dashboards) | C | C++ | Java | Python | MySQL | PostgreSQL | Database Management | Generative AI | Data Analysis & Visualisation | MS Office | PowerPoint | Project Management | Requirement Analysis | Market Research | MIS Reporting | KPI | Dashboard | Typing | Office Suites | Data Annotation

CERTIFICATIONS

- Career Essentials in Data Analysis – Microsoft & LinkedIn
- Master in Microsoft Power BI Desktop and Service
- Data Science with Python
- Machine Learning from Basics to Advance
- Geoprocessing using Python – IIRS
- Professional Diploma in Software Testing & Quality Assurance – MTF Institute
- Microsoft Cyber Suraksha
- Python Beyond the Basic and Intermediate Training
- Coding with Java from Scratch (2022)
- Cyber Security Awareness Program
