- Python Beyond the Basic and Intermediate Training
- Coding with Java from Scratch (2022)
- Cyber Security Awareness Program

PROFILE

Detail-oriented B.Tech Computer Science & Engineering graduate (CGPA 8.09) skilled in **data analysis & visualisation** (Power BI, Advanced Excel Pivot Tables & Dashboards, SQL, Python), **MIS & KPI reporting**, accurate high-volume **data entry**, **digital marketing** (Meta Ads, e-commerce listings, SEO), and **project management**. Completed a 3-month on-site Digital Marketing internship at 5 Petal India and worked as Project Manager. Previously worked as a Data Entry Operator, Image Annotation Engineer, and in the Logistics Department on a contractual basis. Known for multitasking, problem-solving, and team-building.

WORK EXPERIENCE

5 Petal India, Kolkata — July 2026 – October 2026

Digital Marketing Intern (On-site)
- Created and optimised product listings on Flipkart, Amazon, and Meesho
- Set up, monitored, and optimised Facebook and Meta Ads campaigns
- Designed logos, social media stories, creatives, and website pages
- Created and scheduled Instagram and Facebook content, handled customer queries, and supported influencer outreach
- Contributed to campaign planning, performance tracking, and SEO optimisation

Project Manager
- Managed marketing and e-commerce projects, tasks, timelines, and deliverables
- Coordinated with team and management to track progress and resolve issues
- Oversaw product listing, ad campaign, and design workflows

360DigiTMG — April 2024

Data Science & Data Analysis Intern | *Medical Inventory Optimisation*
- **Business Problem:** Rising bounce rate leading to significant patient dissatisfaction
- **Business Objective:** Minimise bounce rate | **Constraint:** Minimise inventory cost
- **Success Criteria:** Reduce bounce rate by at least 30% and increase revenue by at least INR 20 lakh
- Analysed and optimised inventory processes and created reports and dashboards using data analysis tools

Previous Contractual Roles

Data Entry Operator | Image Annotation Engineer | Logistics Department
- Handled high-volume data entry and annotation with a focus on accuracy, and supported operational coordination

LEADERSHIP

College Group Project Team Lead | Calcutta Institute of Engineering & Management
- Led two major group projects (team size 5–7 members) from planning to delivery with task delegation and timeline management
- Built strong team culture, resolved conflicts, and ensured timely completion with high faculty recognition

PROJECTS

Advanced Software Engineering Job Simulation | Walmart Global Tech | Mar 2026
- Designed UML class diagrams for a data processor handling multiple operating modes and database connections
- Solved complex technical challenges across different teams and systems

Power BI Data Visualisation Job Simulation | PwC | Jun 2024
- Built professional Power BI dashboards to visualise HR KPIs and respond to client requirements
- Demonstrated analytical problem-solving and clear data presentation skills

Excel Skills Job Simulation | JPMorgan Chase & Co. | Nov 2023
- Applied data cleansing, manipulation, and conditional formatting techniques; created impactful charts and interactive dashboards
- Learned to record macros and script in Visual Basic for Applications (VBA) for automation

Data Visualisation: Empowering Business with Effective Insights | TCS | Oct 2023
- Completed a simulation creating data visualisations for Tata Consultancy Services
- Prepared questions for a client senior leadership meeting and created visuals to help executives make effective decisions
